1. Product description:

Fiber Roll

Dimensions (in): 4" x 394"

Dimensions (mm): 100 x 10,000

Specification: ALO MF AZUL

Grit: Very Fine

A = 100 mm
L = 10000 mm

1. Application

- Designed for finishing flat and irregular surfaces on metals, stainless steel, non-ferrous metals, and wood.
- High flexibility; does not load up or break.
- Denser than a common fiber pad, allowing effective work on edges and burrs without tearing.
- Excellent for blending clear coats in automotive refinishing without damaging the base material.

2. Operating instructions

- For manual use.
- Can be used wet.

3. Handling

- Initial inspection must be performed with the product inside its original packaging. If any visible damage is detected, the product should not be accepted.
- Handle the fiber with care to prevent tearing or breakage.

4. Storage

- Store the fiber preferably in its original packaging on a flat surface, at least 10 cm (4 in) above the ground, and away from humid, cold, hot, or fluid-exposed areas. Ideal storage conditions are 40–50% relative humidity and a temperature between 15–29 °C (59–84 °F).

5. Packaging units

- 1 piece.
